

GitHub Project Evidence

Accessible Enterprise Dashboard — Evidence Guide

This document organizes the screenshots provided for the Semantic HTML5 & Accessible Enterprise Dashboard repository. They can support evidence of the repository structure, source code, and project documentation.

Evidence checklist

Screenshot evidence	Suggested filename	What it demonstrates
Repository file list	repository-files.png	Files and folders present in the repository
GitHub repository structure	repository-structure.png	Components and docs folders and their contents
index.html source code	index-html-code.png	HTML document and stylesheet link
Project overview / README	project-readme.png	Project summary, objectives, tools, and setup notes

How to upload the evidence to GitHub

1. Open your GitHub repository.
2. Open the **docs** folder (or create an evidence folder if you prefer).
3. Choose **Add file** → **Upload files**.
4. Select the PNG screenshots from your phone or computer.
5. Use the suggested filenames above, then choose **Commit changes**.

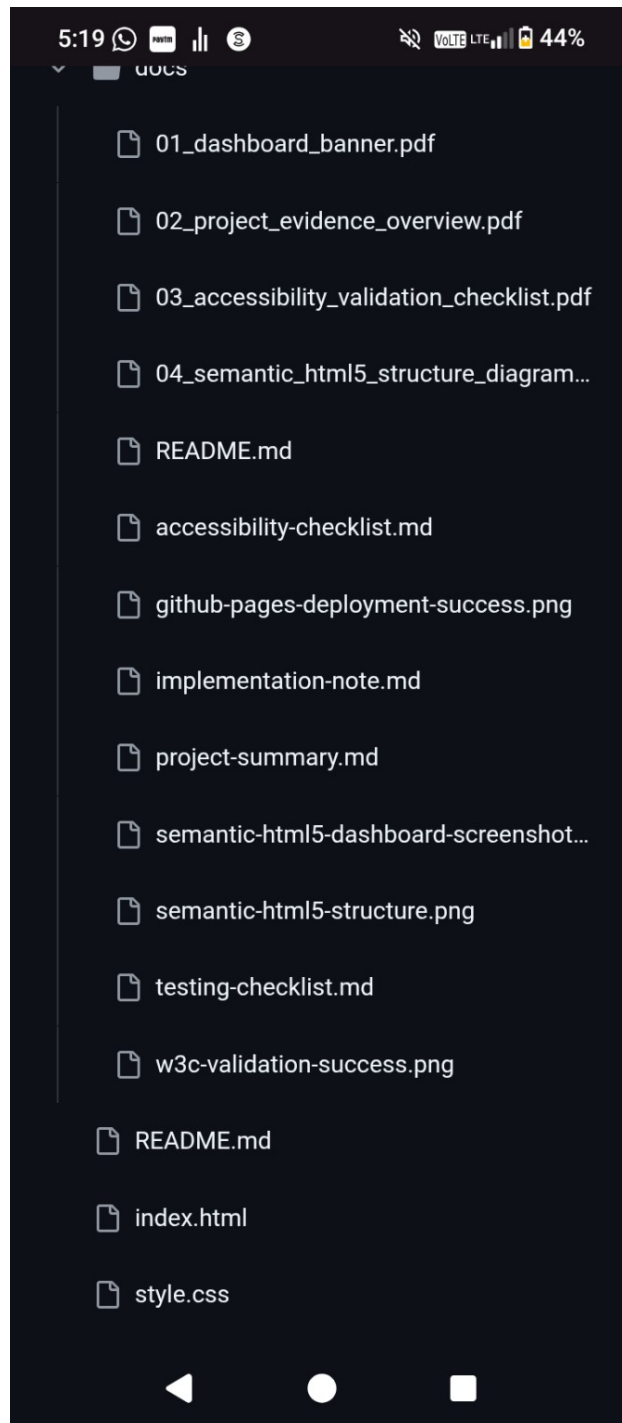

Evidence limitation

These screenshots document the repository, source code, and README. They do not prove that the dashboard renders correctly in a browser. For stronger evidence, add a separate desktop browser screenshot and a mobile browser screenshot showing the actual running dashboard.

Screenshot reference pages

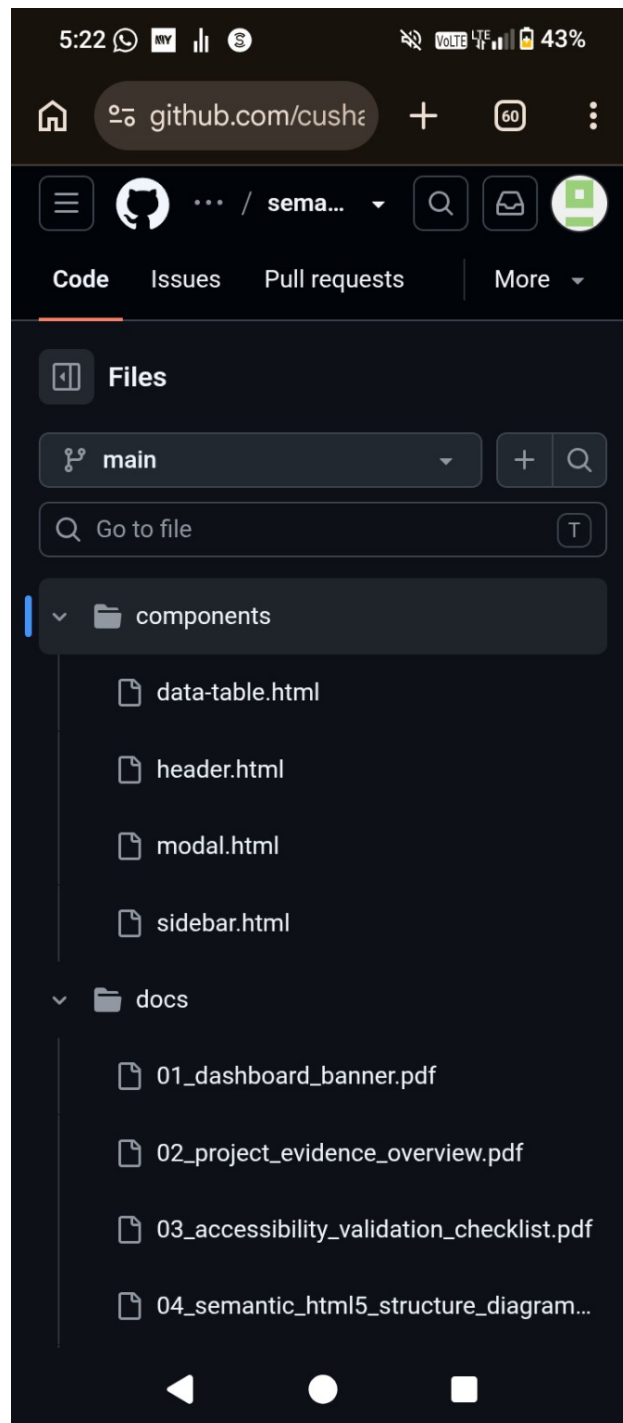

1. Repository file list

Suggested filename: **repository-files.png**

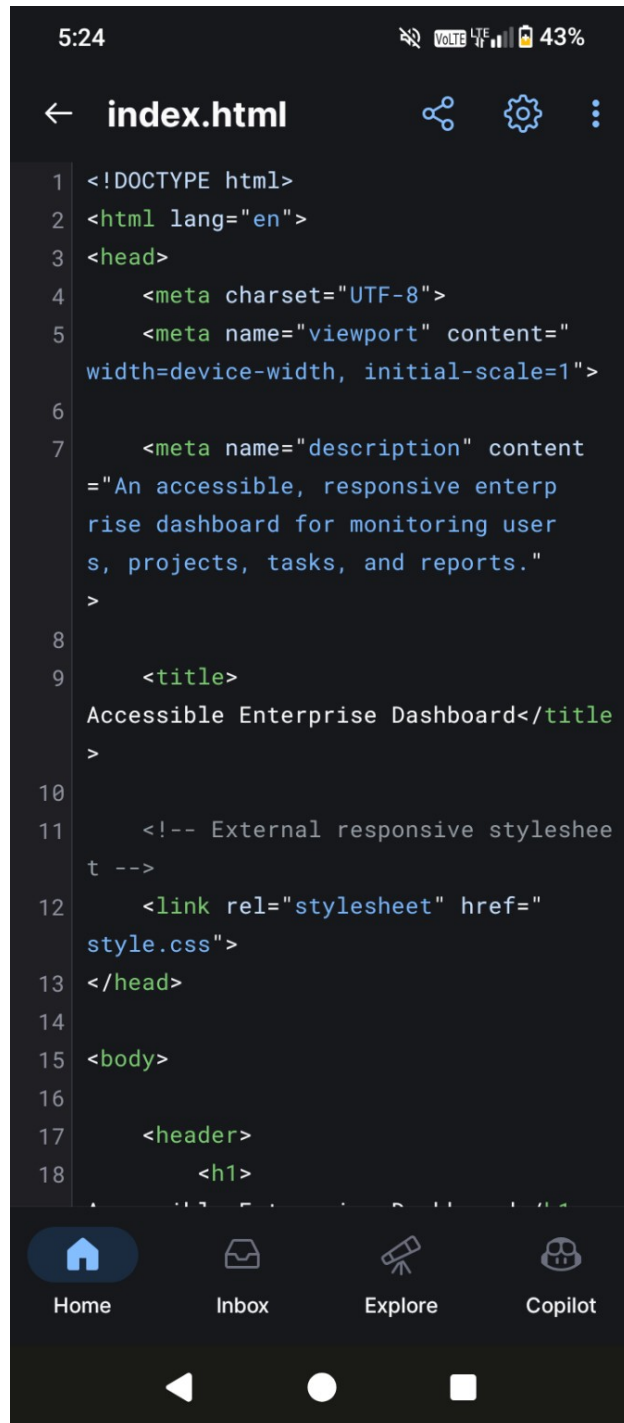

2. GitHub repository structure

Suggested filename: **repository-structure.png**

3. index.html source code

Suggested filename: index-html-code.png
